The First in Synthetics®

In 1972, AMSOIL set all-new standards for motor oil quality when we introduced the world's first synthetic motor oil to meet American Petroleum Institute (API) service requirements. Today, we remain steadfast in our commitment to quality and precision lubricant engineering.

Our state-of-the-art mechanical testing laboratory allows us to stay on the cutting edge of lubricant technology. Equipped with three 480-sq. ft. dynamometer cells capable of housing a minimum of two dynamometers each, the facility allows us to test motor oil performance on-site, allowing quick turn-around times, the ability to modify conditions to measure different oil properties and unique testing not available elsewhere.

Severe-Duty Dyno Results

INTERCEPTOR® Synthetic 2-Stroke Oil was installed in a 2012 Ski-Doo® Renegade X snowmobile equipped with a Rotax® E-TEC® 800R engine. Following a 50-hour severe-duty dyno session designed to simulate a full season of real-world conditions, the engine was disassembled and rated for wear and deposits by a calibrated ASTM rater. Results prove INTERCEPTOR virtually eliminated wear and deposits throughout the entire engine.

Designed to eliminate gear-housing chatter in cars, trucks and SUVs equipped with limited-slip differentials.

Note: AMSOIL synthetic gear lubes do not require the use of this additive. However, not all differentials respond the same and if chatter is noticed, the addition of AMSOIL Slip Lock will eliminate it.

Addresses Ethanol-Related Performance issues

DIRECTIONS: One bottle treats up to 6 gallons for cleanup and up to 12 gallons for continued protection. For best results use with every tank.

Phase separation is when ethanol/water mixtures fall to the bottom of fuel tanks and containers, leading to lean-burn conditions.

Quickshot helps keep water molecules dispersed to prevent phase separation.

Degraded fuel can present a major maintenance issue in motorcycle engines, forming varnish, gum and insoluble debris that clog carburetors, fuel injectors and fuel filters. Carbon buildup can form on the tops of pistons resulting in pre-ignition, rough idling and poor throttle response. Fuel-related problems are only expected to intensify in the coming years as the ethanol content in pump gasoline continues to increase.

AMSOIL Quickshot® (AQS) is a premium fuel additive formulated to thoroughly clean and restore peak performance in motorcycle and powersports equipment fuel systems. It also stabilizes fuel between uses and during short-term storage periods.
